

The
JOURNAL OF THE

Congress of Scientific Ufologists

ISSUE NUMBER THREE

JUNE, 1971

The ROBINSON COMMITTEE
on ETHICS, CORRESPONDENCE AND MEMBERSHIP
REPORT
of the,
SEVENTH ANNUAL CONGRESS
COLUMBUS, OHIO
JUNE 26, 27, and 28, 1970

Issued by the
Publications Committee

Gray Barker, Chairman
Rick R. Hilberg, Robinson Comm.
Edward M. Biebel, Robinson Comm.
John J. Robinson, Robinson Comm.

The Congress of Scientific Ufologists
Seventh Congress
Columbus, Ohio
June 26, 27 & 28, 1970
Columbus Center of Science and Industry

Prelude-

An executive meeting of the Permanent Organizing Committee was called in the rooms of one of the Committee at their room in the Columbus Inn, which had been appointed the official hotel for the Seventh Congress. The meeting took place on the evening of the 25th. The meeting was called to determine the agenda for the Closed Sessions, the program for the reports of officers and any standing or special committees. The arrangement of providing to revive any Old Business items and set up the agenda for any New Business which may have arisen since the last Congress.

Registration

During the Registration period on the morning of Friday, June 26, 1971 the following organizations, publications and individual researchers all members of the Congress registered as delegates.

Kevin McCray-American Flying Saucer Investigating Committee
Steve Balogh-American Flying Saucer Investigating Committee
Colman Vonkeviczky-Intercontinental UFO Research & Analytic Network
John J. Robinson-Intercontinental UFO Research & Analytic Network
Mary Robinson-Saucer News
Ralph Fanning-Independent Researcher
Leone Fanning-Independent Researcher
Edward Jannings-Independent Researcher
Mildred Jannings-Independent Researcher
Allen H. Greenfield-UFO Sighter
Robert S. Easley-UFO Magazine
Ronald Brasdovich-National Scientific Aerial Phenomena Research Organization
Dianne Hanneford-National Scientific Aerial Phenomena Research Organization
Bruce Soniski-National Scientific Aerial Phenomena Research Organization
Gray Barker-Saucerian Publications
Norman Sweinhart-UFO Research Bureau of Lorain
Bob De Luca-UFO Research Bureau of Lorain
Patrick Mathna-UFO Research Bureau of Lorain
Kevin Collins-Aerial Phenomena Investigation Research Center
Richard Walton-Aerial-Phenomena Investigation Research Center
Allan Manak-United Aerial Phenomena Agency
Rick Hilberg-Cleveland Aerial Phenomena Investigations Club
Edward Biebel-Cleveland Aerial Phenomena Investigations Club
Ralph Jarret-UFO Investigators
Timothy Green Beckley-Searchlight
Barbara Hudson-Saucer News
Gary Elvers-Hollow Earth, Saucer and Phenomena Research Society
Ronald Pelger-United Aerial Phenomena Agency

1st Closed Session June 26, 1970 1.00 P.M.

Mr Kevin McCray the Director of the American Flying Saucer Investigating Committee of Columbus, Ohio; the host organization of this Seventh Congress opened the 1st Closed Session of the Seventh Congress by welcoming the delegates to Columbus. He next explained the schedule of events after which he turned the Congress over to the Permanent Chairman Mr. Allan Manak who officially called the Congress to order as a convened Session of the Congress of Scientific Ufologists by calling the Roll. The following organization responded to the Roll Call. -

American Flying Saucer Investigating Committee
UFO Research Bureau of Lorain
Mr. Ralph Fanning

Roll Call of Seventh Congress, continued.

Mr. Robert Easley
 Saucer News
 Searchlight
 Saucerian Publications
 National Investigations Committee on UFO's
 Cleveland Aerial Phenomena Investigations Club
 United Aerial Phenomena Agency
 Intercontinental UFO Research and Analytic Network
 UFO Investigators
 Aerial Phenomena Investigations and Research Center
 3 M UFO Club
 UFO Magazine
 Hollow Earth, Saucer and Phenomena Research Society
 National Scientific Aerial Phenomena Research Society
 UFO Sighter

Chairman Manak then asked Mr. Robinson to take over the ceremony of one minute of silent prayer for the deceased researchers whose name had been placed on the Honor Roll.

Mr. Robinson was then asked to present the Loftin Award since he had been the last recipient of that honor. Mr. Robinson informed the Congress that the Permanent Organizing Committee's choice for the honor had fallen on an amazed Mr. Manak and presented him with the award. Mr. Manak rose and accepted the award from Mr. Robinson and thanked the Congress. He explained how amazed he was since although he was on the Permanent Organizing Committee he had been kept in the dark regarding the choice. Chairman Manak then called for the reports of the Standing Committees. Mr. Robinson of the Robinson Committee on Ethics, Correspondence and Membership then rose and read his report which was accepted with a minor correction of address. (See Appendix No. 1)

Mr. Brasdovich of the Brasdovich Committee on Projects next reported that he had received a very bad response to the notification in the Robinson Press release regarding his committee. Only CAPIC, he reported, had contacted him.

Chairman Manak next asked for the progress reports of attending individuals, publications and organizations.

Mr. Kevin Collins reported that the Aerial Phenomena Investigations Research Center were at that time conducting a public education research questionnaire the final report of which had not been evaluated.

Mr. Gray Barker of Saucerian Publications reported that he had been working with Al Bender on further information about his experience and story. He also stated that he had with him at the time a tape from Mr. Bender which members might hear at a later date. Mr. Ronald Pelger of the United Aerial Phenomena Agency presented the Congress members with typed reports of the UFO Questionnaire and findings they had conducted and the entire report of the Bonnie Berea Case. (See Appendix No. 2)

Mr. Jarret of the UFO Investigators stated that his group were making a study of the Magnetic Field Effect which were sometimes reported to have occurred with a sighting. Mr. Colman Vonkevichsky, Director of the Intercontinental UFO Research and Analytic Network then read to the Congress a translation of a letter from Karl L. Veit the Director of Deutsche UFO Studiengemeinschaft of Weisbaden, the publisher of UFO-Nachrichten and the European representative of IOUFON. Who as such is also a Congress member. Quote:-

The Congress of Scientific Ufologists

Chairman A. Manak

Dear UFO friends, Greetings.

My warmest regards to the American Congress Delegates. May you have a very successful Seventh Congress.

Karl L. Veit.

(See Appendix No. 3)

1st Session Progress Reports Continued.

Mr. Colman Vonkevichsky of ICUFON then presented each delegate with a copy of the Press Release # 12 which had been printed for release at that time. (See Appendix No. 2)

Mr. Ralph Fanning an individual researcher next made his report on the conference sponsored by the Aerial Phenomena Club of Central Illinois which was held at Bradley University, June 13th 1970. Mr. Fanning reported that the first speaker was Dr. Allen R. Utke, Ass't. Prof. of Chemistry, Wisconsin State University who spoke on "UFO's and the Problem of Scientific Evidence". He was followed by Mr. Ted Phillips of the Missouri State Highway Dept. who spoke on the special investigations he had made regarding Burned Circles and Burn Marks as evidence he also included information regarding the "Saucer Nests"

The next speaker was Mr. John F. Schuessler the Senior Engineer of the McDonnell-Douglas Aeronautics Co. who discussed aeronautic phases of the UFO problem. Mr. Robert Smulling a professional photographer then lectured on photographic effects and what to look for in a UFO photo.

Mrs. Coral Lorenzen ended the afternoon portion of the conference with an "Up to Date Report of the UFO Situation"

After the supper had been served Mr. Fanning stated that, Dr. J Allen Heynek discussed the current state of UFO research with emphasis on the fact that future progress in the field would have to come from the efforts of the civilian researchers.

Mr. Bradsovich of the National Scientific Aerial Research Organization read their annual report. (See Appendix No. 2)

Mr. Swinehart of the UFO Research Bureau of Lorain announced that the report of his organization was not yet ready but would be mailed to Mr. Robinson in time to be included in the Journal. (See Appendix No. 2)

Mr. Kevin McCray gave the report of the American Flying Saucer Investigations Committee. (See Appendix No. 2)

Mr. Edward Biebel then gave a report regarding the UFO Watch Filter Center and the Project Will-O-The-Wisp. The Project Will-O-The-Wisp report is too long to include in its entirety in the Journal. The Erhardt Data Index System information has however been removed from it and is included. (See Appendix No. 2)

A resolution was made that the UFO watch Filter Center be made an integral part of the Congress. Mr. Fanning so moved and when the motion was seconded the Chair announced that the discussion on this motion would be tabled until the second session.

The Chair also asked Mr. Robinson the Recording Secretary to contact Mrs. Lorenzen of AFRO regarding affiliation of that group with the Congress.

Mr. Bob Easley next reported that even though he was at present in the uniform of the U.S. Navy, he had attempted to take an opinion poll in the various countries he visited as a member of the armed forces. UFO Magazine has printed the opinion poll of Mr. Easley as well as a NSAPRO Field Research Guide. (See Appendix No. 2)

Chairman Manak adjourned the first closed session.

Second Closed Session 3.30 P.M. June 26, 1970

The Second Closed Session of the Congress of Scientific Ufologists was called to order by the Permanent Chairman Mr. Manak. Discussion on the pending motion regarding the UFO Watch Filter Center being operated as part of the Congress work was then carried on and the motion was carried when put to a vote.

Mr. Allen Greenfield, publisher of the UFO Sigther and the Alternate Horizons Newsletter, next made his report. He had participated in a second investigation of the Brown Mt. Lights, reported on the situation regarding saucer nests in New Zealand, researched historical MIB cases which appeared to have dated back to over 4 or 5 hundred years ago, researched numbers of unusual phenomena cases and contacted the Georgia State senator Richard B. Russell to ascertain that the Air Force records regarding UFO would be stored in the Air Force Archives. (See Appendix No. 2 for partial information of this researchers numerous activities, much of the information given had to be deleted from many of his reports as well as other reports because of the lack of space. J.J.R.)

Mr. Robinson then announced that one item of old business which had never been taken care of was the proposed draught amending the Code of Ethics. This draught which had been attached as a rider to the original resolution to create a set of By-Laws had never been voted upon since the Sixth Congress. Mr Greenfield the author of the instrument announced that he wished to withdraw the instrument and this closed the matter.

Second Closed Session continued.

Mr. Fanning then addressed the Chair with the announcement that a resolution must be passed regarding the depository bank. It was resolved that the "Citizens Commercial Bank of Celina Ohio" would be the official depository bank of the Congress of Scientific Ufologists. A motion that the treasurer Mr. Fanning be bonded was discussed and since it was conceded that Mr. Fannings personal responsibility would be involved as the legal treasurer of the Congress and he would be legally responsible and legally libel, for any monies placed in his charge the motion was defeated.

Chairman Manak then proposed an amendment to the By-Laws regarding the qualifications for organizations who wished to host the Congress

Amendment to Title III Special Administration and Procedure

Articles Number 9 and Number 10 to be added to Title III

Article-9

A qualification for a bid to host the Congress must be that the host organization will have attended at least three (3) previous Closed Sessions.

Article-10

A qualification for a bid to host the Congress must be that the host organization will have attended the two (2) immediate preceding Closed Sessions of the Congress

Mr. Fanning moved for the proposition and Mr. Biebel seconded the motion. Mr. Greenfield the parliamentarian read to the Closed Session the portion of the By-Laws regarding amending the By-Laws by Congress Vote. Title IV requires a two third vote in favor. Discussion being at an end the vote was taken and well over two third voted in favor. A proposal that a mid term meeting of the Congress be held was again raised for discussion. The discussion ended in a motion that the Permanent Organizing Committee meet each mid-term and extend to all member organizations the privilege of sending a delegate to aid in the deliberation held in order to clarify procedure and operation of the Congress. The motion was seconded and a vote so moved.

Mr. Robinson then read a letter from Mr. George Smyth of Elizabeth, N.J. which was greeted with applause. (See Appendix No. 4)

Bids for the next Congress were the next item on the agenda. Mr Hilberg then placed a bid for Cleveland as the next site of the Congress. Mr. Hilberg stated that the bid was made under the joint auspices of The UFO Magazine and the Cleveland Aerial Phenomena Investigation Committee. The bids being closed it was moved and seconded that the Cleveland bid be accepted. The motion was carried.

Mr. Gray Barker next presented the following resolution,

"Be it resolved that members of the Congress express their appreciation to Kevin McCray, other officers and members of the American Flying Saucer Investigating Committee of Columbus, Ohio, for their work in sponsoring the 1970 Congress. Further, that we appreciate their hospitality in inviting us to their city."

The resolution was accepted by acclamation.

Mr. Barker then made the following motion.

"Effective with the 1971 Congress the next recipient of the Robert Loftin Award be selected by a committee to consist of the former and future recipients of this award. Further, that the method of voting be determined by that committee."

The motion was seconded and carried with no discussion.

Mr. Robinson then moved that Dr. Miran Lindtner the Intercontinental representative of ICUFON, who was killed "August 29th 1969" in Frankfurt, West Germany be placed on the Congress Honor Roll. The motion was seconded and carried. (See Appendix No. 5)

The chair adjourned the second session.

Third Closed Session 7.00 P.M. June 26th 1970

Chairman Manak opened the Session

A motion to commend Mr. Patrick A. Hughes for his excellent report of over 1000 worldwide 1968 sightings was made and seconded, the motion was carried.

Third Closed Session continued.

Mr. Colman Vonkevichsky of ICUFON next made an appeal to the Congress delegates that they make every attempt to encourage known scientists to concentrate on UFO research. In order that a panel of reputable scientists might be created.

Mr. Brasdovich of the Committee on Projects appealed to all members that they keep him fully informed of any projects they might have in view.

Mr. Edward Biebel then appealed to all members to aid him more in an effort to advance the work of the UFO Watch Filet Center.

A motion was made and seconded that the Erhardt Data Index System (EDIS) be adopted as the official system of all CSU members. The motion was carried when put to a vote. (Mr. Joseph Erhardt publishes U.F.O. Cronolog, see Will-O-the-Wisp Appendix No. 2 for detailed information regarding this data index system.

Mr. Colman Vonkevichsky of ICUFON next gave a report of UFO research in Russia.

A discussion regarding incorporating the Congress and requesting a non-profit status was next started. The Chair requested Mr. Biebel to look into the matter and make a report at the forthcoming P.O.C. midterm meeting

Mr. Brasdovich next took the floor and gave a vivid description of the sky watch work his organization had done during the summer and fall of 1969. He described the equivilent of almost thousands of dollars of commercial equipment his organization had created by do-it-yourself methods and explained the project in hand for constructing three mobile tracking trucks with more equipment for future research.

The Chair then adjourned the last Closed Session.

June 27, 1970 Afternoon Parlor "D" Discussion

Due to the fact that no formal sessions or meetings were set up for this day the delegates met and arranged an informal discussion group. The delegates each contributed a share toward the amount needed to hire Parlor "D" of the Christopher Inn for the period of three hours. Mr. Ron Pelger acted as informal chairman and an informal round table discussion took place regarding all aspects of the UFO situation in that crowded room which even though it was air conditioned became heated not only from the talk but also from the prescence of at least 40 people.

November 14, 1970 Permanent Organizing Committee Midterm Meeting

The Permanent Chairman called the midterm meeting to order and then proceeded to appoint the following new members to the Permanent Organizing Committee with the view of creating a more versatile and effective Permanent Organizing Committee.

Mr. Edward Biebel---Mr. Ralph Fanning---Mr. Lawrence Blazey
Mr. Yonah Ibn Aahrns name was formally removed from this committee.

The Permanent Organizing Committee is now listed as follows

Mr. Allan Manak, Permanent Chairman
Mr. Rick Hilberg, Co-Chairman
Mr. John J. Robinson, Recording Secretary
Mr. Ralph Fanning, Treasurer
Mr. Edward Biebel, Parliamentarian & P.O.C Secretary
Mr. Gray Barker
Mr. James Moseley
Mr. Allen Greenfield
Mr. Lawrence Blazey

Mr. Manak also asked that his appointment be approved by a formal resolution of the Congress in Session.

Mr. Biebel spoke regarding the incorporation of the Congress in the State of Ohio and the matter was tabled to be taken up at a formal Session of the Congress

The members of the P.O.C agreed that formal invitations to participate in and speak at the Congress should be forwarded to the following:-

Hynek	Sprinkle	Brad Steiger
Saunders	Freedman	and to N.A.S.A (Lewis
Sanderson	Sagan	Research Center-Cleve.)
McDonald	Livingston	To send someone to speak
Harder	Curtis Fuller	on Science, Space and/or
		UFO's.

Nov. 14, 1970 Midterm P.O.C. Meeting continued

The Chair appointed Mr. Biebel and Mr. Hilberg to serve with the Robinson Committee. A motion to grant \$25.00 to the UFO Watch Filter Center for expenses was seconded and carried.

The Chair then presented the following resolution for consideration, which P.O.C. members Biebel, Hilberg, Barker and Moseley concurred with.

Note- Since Title VI Section 3 reads as follows

(3) Amendments effected under Section Two, this Title shall not become effective as actual by-laws until the agency involved has made reasonable effort to notify other appropriate agencies.

The following resolution which involves an amendment to the By-Laws does not become effective unless the entire membership is informed or a 2/3 vote of the Congress so amends the By-Laws for the P.O.C. as an agency realizes that they have not so informed the entire membership of the Congress.

Resolution

Subject: Clarification of Membership Status

Title IV. Membership and Ethics

Section (1) to be deleted

Section (2) to become Section (1)

Section (3) to become Section (2)

Section (3) to read as follows

Section (3) Member organizations and/or publications and/or individual researchers are required to contribute the sum of (\$5.00) Five Dollars per annum to the treasurer. The contribution shall be payable no later than six months after the first of the fiscal year (Fiscal year: January 1st to December 31st, inclusive)

Failure to contribute shall be certified to the committee charged with administration of membership. (See Section (2) this Title)

Concurred with by the following at P.O.C Midterm Nov. 14, 1970

Mr Allan J. Manak, Permanent Chairman

Mr. Rick R. Hilberg, Co-Chairman

Mr. Edward M. Biebel. Parliamentarian and P.O.C Secretary

Mr. Gray Barker

Mr. James Moseley

The Chair then adjourned the meeting.

Organization
or Committee

The Robinson Committee on
Ethics, Correspondence and
Membership of the Congress
of Scientific Ufologists.

The Robinson Committee Report
to the 1970 Seventh Congress
of Scientific Ufologists
held in Columbus, Ohio
on June 26, 27 and 28, 1970

Honorable Permanent Chairman, fellow members of the Permanent Organizing Committee
and Delegates to the Congress.

Ladies and Gentlemen:

I have the honor to report that during the past year, I have conducted the following
work.

Transcribed from the tapes of the Sixth Congress the minutes of all Closed Sessions
of that Congress.

Transcribed the taped address of Mr. John Keel to that Congress.

Composed and typed the 33 page report which constitutes the now published second issue,
the December 1969 Issue No. 2, of the Journal of the Congress of Scientific Ufologists.

Conducted the mail vote by the Permanent Organizing Committee in order to determine
the host organization from those organizations who had bid for the honor of hosting
the Seventh Congress.

Notified the receipt organization of the decision of the P.O.C.

Conducted a mail nomination from the Permanent Organizing Committee for persons worthy
of receiving the honor of the Loftin Award

Conducted a mail vote of that same committee for the receipt of the Loftin Award.

Created a Press Release and Notice to membership regarding the Seventh Congress which
was mailed to all members and important publications concerned.

Notified Mr. Walter Zabowski, sobriquet Mercurius Saturnius Player, of the 6th Congress
vote of anathema by letter. (see attached copy)

I have also to report that we have lost the following member organization and publication
Canton UFO Research, which has disbanded.

Saucer Scoop, which has ceased publication.

We have however gained the following organizations as new members,

Unidentified Flying Objects Investigating Team, Mr Asam Lewandowski, Director; 1513
Woodmont Avenue, Arnold, Pa. 15068

National Scientific Aerial Phenomena Research Organization, Mr Edgar G Smith, Director;
4637 Warner Road, Garfield Heights, Ohio. 44125

Hollow Earth, Saucer and Phenomena Research Society, Mr. Gary Elvers, Chairman,
607 West Miami Avenue, Logansport, Ind. 46947

Mr. Donald W Lantz, R.D. 1, Bloomville, Ohio 44818; an individual researcher

Respectfully Submitted

John J. Robinson

Chairman Robinson Committee

The Congress of Scientific Ufologists

SIXTH ANNUAL CONGRESS
CHARLESTON, WEST VIRGINIA

FRIDAY - SATURDAY, JUNE 20-21, 1969

Reply To: John J. Robinson
Recording Secretary of the
Permanent Organizing Comm.
251 New York Ave
Jersey City, N.J. 07307

Sir:

This will inform you of the resolution passed at the Second Closed Session of the Sixth Congress of Scientific Ufologists, which bears upon your moral conduct.

At the Sixth Congress of Scientific Ufologists, held at the Daniel Boone Hotel of Charleston, West Virginia on June 20, 1969, a report of your unethical conduct was made by a member body, this report was verified by three other member bodies. Therefore the following resolution was placed before the Congress in the form of a motion which was seconded and voted upon.

" Be it resolved that the membership of the Congress of Scientific Ufologists hereby censures Walter Zabowsky, alias Mercurius Saturnius Player, who has committed the following acts which are detrimental to the best interests of Ufology and which are unbecoming to a serious researcher: He has used for his own profit in a completely unauthorized manner material written by other researchers, and he has appropriated for himself actual books, photographs, magazines, etc., belonging in the files of at least four fellow researchers. These acts are in our opinion most decidedly in violation of the spirit of the Code of Ethics of the Congress. "

The resolution was passed unanimously by the Congress of Scientific Ufologists.

Because of this be it known to you that you are anathemized by all members of the Congress of Scientific Ufologists.

Ethics, Correspondence & Membership

During the Spring of 1970, the United Aerial Phenomena Agency (UAPA) conducted a "UFO Opinion Questionnaire." The purpose of the questionnaire was not designed to solve the mystery of UFO's, but merely to combine opinions of UFO researchers to learn the general views on the subject.

There were 30 questions selected for the questionnaire of which the majority pertain to Ufology itself, while a smaller percentage are of various achievements by certain people and/or organizations.

Special thanks are given to the many people and various organizations who took time and made a little effort in submitting their views. However, there were still, as always, those certain few who simply neglected to cooperate. Of these few, by the way, are some of the better known Ufologists.

Cooperation is one of the answers to success. How can the UFO movement head towards a successful study if cooperation does not exist among us?

Many thanks again, though, to the real UFO "buffs" who came through.

Of 123 questionnaires mailed, 75% were returned to the UAPA for general review.

The final results are as follows:

- 1) What do you think the status of UFOlogy is at the present?
Lack of news coverage.
- 2) Do you feel there is a slowdown in UFO organizational activity?
If yes, why?
Lack of publicity due to no news coverage of sightings.
- 3) Do you feel less sightings are being reported at the present time?
80% - yes; 15% - no; 5% - undecided.
- 4) Why do you think a large number of UFO organizations have disbanded?
35% - lack of interest; 17% - Condon; 9% - no support; 8% - news coverage.
- 5) What are your comments on the Condon Report?
Cover up by Condon, working for U.S.A.F.
- 6) Regarding the book "Scientific Study of Unidentified Flying Objects," what are your comments on the conclusion given of the six (6) Fort Belvoir "black ring" photos? (See plates 32 thru 40)
65% - negative; 30% - positive; 5% - possible.
- 7) What reason or reasons do you think the Air Force closed Project Blue Book?
70% - Condon Report; 20% - money; 10% - miscellaneous.
- 8) Do you feel the "Congress of Scientific UFOlogists" is a strong UFO study group capable of accomplishment in the field?
45% - yes; 45% - no; 10% - miscellaneous.
- 9) List three (3) projects you would like to see planned and carried out by the "Congress of Scientific UFOlogists".
 1. Better Publicity for Congress.
 2. Project Grey File.
 3. Watch Center.
- 10) What are your comments on the last session of the "Congress of Scientific UFOlogists" held in Charleston, W. Va. in June 1969?
28% - good; 20% - bad; 25% - did not attend; 27% - misc. answers.

11) Do you believe the Men in Black theory is fact?

55% - no; 35% - yes; 10% - ?

12) Do you feel there is organized activity to halt UFO research? If Yes, why?

60% - no; 20% - yes; 20% - miscellaneous.
To confuse the public - not by the Government.

13) Do you support any contactee claims? If so, list up to three.

55% - no; 30% - yes; 15% undecided.

1. Hill
2. Darrenberger
3. Fry

14) Do you feel the fatality case of Thomas Mantell Jr. was actually caused by a UFO?

60% - yes; 35% - no; 5% - undecided.

15) Regarding the Allende Letters introduced by the late Morris K. Jessup in his book "The Case for the UFO" in 1955, do you feel this mystery has any relation to UFO's? If yes, why?

60% - undecided; 25% - no; 15% - yes.

16) Do you feel secret UFO bases exist in remote areas on earth? If so, what areas?

40% - yes; 40% - no; 20% - undecided.

1. Polar
2. Undersea
3. Not Physical

17) Do you believe UFO's are related in some way to blackouts?

80% - yes; 10% - undecided; 10% - no.

18) Would you say there is a similarity between the Lonnie Zamora incident (Socorro, New Mexico) and the Eddie Laxton Case (Texas-Oklahoma border)? If so, in what respect?

30% - yes; 30% - no; 10% - undecided; 30% - did not know subject.

- 19) Now that man has landed on the moon, do you doubt past theories of UFO bases situated there?

40% - yes; 35% - no; 25% - undecided

- 20) Do you feel the news media has given less recognition to the UFO subject within the past year? If so, why?

90% - yes; 10% - no

1. Controlled News
2. Condon Report

- 21) Which of the following theories do you favor the most?
Extraterrestrial, Inner Earth, Dimensional Fault Zone, Time Travelers, Terrestrial, Space Animals, Alternate Reality, Scientific Explanation, Other.

55% - Extraterrestrial; 15% - Scientific Explanation; 15% - Other;
5% - Terrestrial; 5% - Alternate Reality; 5% - the remainder

- 22) Do you think the UFO's are hostile, friendly, other. If other, state briefly.

2% - Hostile; 18% - Friendly; 80% - Other. Not known at this time.

- 23) List three (3) or more UFO researchers who have either suddenly or slowly slipped out of the UFO field?

20% - Moseley; 20% - Kehoe; 15% - Chop; 15% - Evans;
15% - Whritnoure; 15% - Jessup

- 24) List, in order, the top three (3) UFO personalities who have contributed their best to the UFO field within the past three (3) years. Give brief reasons!

1. Corol Loranzen - Oldest Publication - Still Publishing
2. Dr. Hynak - Scientific Methods
3. John Keel - Interesting Theories Very Complex

- 25) List, in order, the top three (3) UFO personalities who have contributed their best to the UFO field in all history of UFOlogy. Give brief reasons!

1. Kehoe - Starting With Publishing And Good Publicity.
2. Vallie - Scientific Methods.
3. Fort - Early Contributions of Unknowns.

- 26) List in order, the top three (3) "active" UFO organizations which are presently contributing useful material on the subject!
1. APRO
 2. UAPA
 3. NICAP
- 27) In your estimation, list in order the top three (3) books ever written in UFOlogy.
1. Report on UFO's - Ruppelt
 2. Anatomy of a Phenomena - Vallie
 3. Flying Saucers Are Real - Kehoe
- 28) List in order, the top five (5) active UFO publications.
1. APRO Bulletin
 2. Flying Saucer Digest & Flying Saucer Review
 3. Flying Saucers
 4. Saucers Space & Science
 5. Saucer News & N.I.C.A.P. Investigators
- 29) What, in your own estimation, are the three (3) major UFO sightings of all time?
1. Lonnie Samora
 2. Trindade Island
 3. Arnold & Gil
- 30) What, in your own estimation, are the three (3) major UFO landings of all time?
1. Soccoro, New Mexico
 2. Hopkinsville, Kentucky
 3. Ann Arbor, Michigan

For the sake of recognition in the future, I'll call this the "Bonnie Berea" case. With this case I will attempt to show the reader how long and what work is desired by the researcher to be factual and at all cost, fool-proof.

Stage #1

On June 22, 1967, at approximately 9:55 p.m., I received a phone call from Mr. Don Brill, co-owner of Commerce Photo Studios and Lab here in Cleveland.

He stated to me at this time that he had just received two (2) photos of an unknown object photographed within the last month.

Upon further questioning this is what was established at this time.

1. Where were photos taken? Answer: Unknown
2. Who took the photos? Answer: Unknown
3. How did you receive them (the photos)? Answer: By a certain party who at this time kept anonymous, and was in the same room that Mr. Brill was upon making this particular call.
4. After learning that a go-between was involved, I continued my questions.
5. What kind of Camera was used? Answer: An insta-matic, type unknown.
6. Was there any other witness? Answer: Unknown
7. What time were these photos shot? Answer: Around 3 a.m.
8. When were they shot? Answer: Sometime in May because anonymous said witness tried to get them developed with rest of roll and the two photos (number 9 and number 10) were sent back undeveloped. This according to anonymous made witness very mad. Witness took negatives back to Drug Store for developing. Upon receiving pictures there is a date that appears on both negatives and positives. To further emphasize, said witness stated to anonymous that photos were taken two (2) or three (3) weeks earlier.

9. What is witness's name? Answer: I don't know, but if you want to talk to the go-between he is right here.

The next part of the questioning was with the go-between.

1. Who is the person who took the pictures?
Answer: A woman
2. What is her name? Answer: Let's just call her Bonnie.
3. What is your name? Answer: Withheld because party wants to be left entirely out of the story.
4. How did you receive the pictures? Answer: She gave them to me. You see she was showing them to people where she works. Everybody was laughing at her except an airlines pilot and myself.
5. Do you work where she does? Answer: Yes
6. You mean she just gave them to you? Answer: Well not exactly. I know her and she was upset because no one would believe her story.
7. Do you? Answer: I don't know, well yes, you see I believe in flying saucers.

EDITOR'S NOTE: This is the first time I suspected that the said witness did not take these pictures.

I then asked to speak to Don again.

1. Well Don what do you think? Answer: I don't know. There's something on the pictures all right. But I'll need the negatives.
2. Can you get them? Answer: Yes; the go-between said she (Bonnie) would give them up if she could get a couple of blow-ups back in return.
3. When do you get the negatives? Answer: Tomorrow evening or Saturday. (Editor's note 6/23 - 6/24)
4. Call me when you get them. Answer: Will do.

Stage #2

Saturday, June 24, 1967, at the home of Mr. and Mrs. Brill.

I arrived at the Brill's home approximately 1 p.m. At this session I learned the following details of said sighting.

1. The pictures were returned to the witness by the go-between in exchange for the negatives.
2. The witness wanted the negatives back by Monday, June 26, 1967.
3. I would meet the go-between if I could be at the Brill home at 8 p.m., June 26, 1967.
4. The go-between would not know I would be at the Brill home.
5. The witness had told the go-between that someone had made contact with her. She was to hand over all pictures and negatives.

The evaluation of the negatives by Mr. Brill appears following:

Stage #3

At Approximately 7:55 p.m., June 26, 1967, I along with Mr. Ron Pelger arrived at the Brill home.

- A. The so-called go-between had already been there and had picked up the negatives at the request of the witness.
- B. The go-between had admitted that the witness was frightened by the telephone call she had received Saturday, stating that this party would pick up the pictures and negatives Monday. This being Monday evening, she was starting to panic.
- C. At approximately 8:45 p.m. the go-between came back to the Brill home to pick up the pictures that had been made in the form of 8 x 10 glossy, black and white blow-ups.
- D. Mr. Pelger and myself proceeded to question the go-between.

Evaluation of third session:

- A. The blow-ups were in question--answer appears following.
- B. The go-between seemed very much interested in finding out the evaluation.
- C. He seemed to be telling the truth.
- D. He was not shaken by certain questions that were meant to be very objective.

E. He seemed sincere and honest.

EDITOR'S NOTE: After questioning the go-between for over forty-five minutes (45 min.), he made a telephone call to the witness asking her if it would be all right for me and Mr. Pelger to talk with her that very same night (one hour later to be exact).

1. At this time we learned for the first time where the witness worked.

(a) It was a restaurant-cafe.

(b) It was in the City of Berea.

Names withheld.

Stage #4

Mr. Pelger and myself meet witness at approximately 10:10 p.m. that evening (June 26, 1967) at her place of employment. The witness was just getting off duty. We were invited over to a table where we proceeded to question the witness.

The following is what we have learned, remembering at all times to gain the confidence of the witness.

1. The pictures were taken on or about the 4th or 5th of May 1967.
2. The time was approximately 3:25 a.m. on same.
3. There was another witness involved. (her father)
4. Witness, father, saw object in North Ridgeville Township.
5. Witness, father, drove to Berea to meet daughter (witness).
6. When witness was on 2nd floor of an apartment in Berea object was photographed.

About the Object

1. Object was very bright.
2. Color was of bright red and orange (like the color of a sun at sunset).

3. Object hovered outside apartment window.
 - A. First picture taken through window.
 - B. Second picture taken through open window as object was hovering.
4. While object was hovering it seemed to be wobbling on its axis.
5. Center section around object was definitely spinning.

EDITOR'S NOTE: Witness referred to the center section as a "platform".

6. Object had lights on the "platform" all around that were very bright.

EDITOR'S NOTE: These lights show up very clearly on photographs.

7. Top of object was rounded (like the roundness of an egg).
8. Bottom of object was also rounded (but more like the roundness of a toy top).

EDITOR'S NOTE: This type of roundness can clearly be seen on the photographs.

9. Witness stated object was visible outside apartment for approximately 3 to 5 minutes. She also stated she could not be sure for she really isn't a good judge of time under these circumstances.

Her Personal Feeling About the Object

1. When witness first saw object through window she was shaken to the point of not turning away. She could not take her eyes off the object.
2. It seemed to captivate her.
3. She claimed her body became rigid.
4. Thought object was coming down (landing).
5. Figures object to be the length of a car and about 3 to 4 feet thick.
6. Object thought to be very close.

Evaluation of Testimony

At this point or stage of the case I would say.

1. Witness appeared calm, but very excited.
2. She was telling the truth.
3. She had no prior knowledge of UFO's.
4. She could not give exact date.
5. She had always laughed at people who claimed to have seen UFO's.
6. Used a 304 insta-matic camera.
7. Wanted to talk to someone with knowledge of UFO's.

Summation

1. Witness turned over negative to me for further study.
2. Witness agreed to loan us the pictures so we could make color slides for evaluation only if negatives were returned. The agreement was set for 2 or 3 days.
3. Witness also agreed to let us question her father (which will be set at a future date).
4. Witness also agreed to let us go to her apartment, in the future, and take photographs of same area. (At this time we could also take measurements of the trees and parking area for distances in relationship to object.
5. Mr. Pelger and witness worked out a sketch of the object as seen from side view.
6. Witness gave first name (Bonnie) and telephone number only.

All summation here is after the first four (4) stages only.

Stage #5

I tried to contact the witness to return the negatives and blow-ups, black and white prints. Date was June 28, 1967, time 7:06 and 7:52. No answer.

On June 29, 1967, I made 3 telephone calls to witness's home. On all three occasions there was no answer.

On June 30, 1967, the first call to the witness's home, at 2:47 p.m., proved good.

At this time I told the witness that I was trying to contact her for 3 days. She replied that she was not home. She also said that she had bad news for me. The pictures were in her handbag and she believes they were stolen. She carried the pictures in her handbag just in case we would show up at her place of employment.

Before I would ask her any more details, she told me to take the original negatives that I had in my possession and use them to get more pictures.

With this, I thanked her and told her she would hear from me in 3 to 4 days.

I then turned the negatives over to Mr. Brill at his home on July 2, 1967. At this time he stated that it would take from 5 to 7 days to receive the pictures.

Final Stage of the Bonnie Berea Case

At approximately Stage #6, Ron Pelger stated the object in the picture reminded him of a picture he had seen somewhere. Suddenly Ron walked to the file drawers and pulled out a Post magazine of December 17, 1966; there was the object that was duplicated in the photo, identical markings and all.

Need it be said that this was another attempt to hoodwink dedicated people belonging to UFO groups. People of this type would receive enjoyment out of kicking ice cream cones out of children's hands or setting fire to the Declaration of Independence.

Thank goodness the people connected with the UAPA are conscientious, dedicated investigators and are not hurried into stating whether a sighting is valid or a hoax until a qualified investigation is made.

Therefore, it is only fair that we write off the Bonnie Berea Case as an earnest endeavor to perpetrate a hoax-- which did not work. So---the case is closed---period.

Abstract: THE GRAVE INTERNATIONAL RESPONSIBILITY BEHIND THE UNITED STATES
POLICY ON THE NON-TERRESTRIAL AERIAL OBJECTS (UFOs) ACTIVITY.

On June 26, 1970 in Columbus, Ohio (U.S.A.) at the 7th Congress
of Scientific Ufologists, Colman VonKeviczky, MMSE. Project Director of
the Intercontinental U.F.O. Research and Analytic Network issued the
following statement:

"On February 7th, 1966 an odd news item was given world wide
attention through the news media: 'U.N. secretariat staff member's Memorandum
urged the Secretary General, to keep non-terrestrial aerial vehicles
global operations under U.N. surveillance'.

This memorandum was the first official step ever taken in behalf
of scientific ufological research.

The supporting evidences of the proposal were:

1/ For more than two decades superpowerful alien spacecrafts
activity have been observed all over the world by the population, private
UFO researchers, governmental and scientific authorities of the nations.

2/ Spacecrafts' abnormal configuration of forms, incredible
maneuvers are not associated with any known conventional air- or space
vehicles.

3/ No nation has identified them as being of earthly origin.

From the view of international law, the unidentifiable spacecrafts
earthbound operations are mainly restricted to nuclear, space, military
and security installations, strategical areas, vital lines of communication
and transportation, which are violations of international conventions and
the nations' aerial and territorial sovereignty.

From the view of national and global security by causing power
black outs, disasters in aerial navigation, severe injuries and death,
in the testing of their unknown weaponry; they are not only endanger the
human life and property, but the activity indicates a planned permanent
landing on the earth.

These statements were verified by a comprehensive world wide
comparative analysis of the alien crafts, leading to the following

.../...

CONCLUSIONS:

a/ THE NECESSITY FOR ESTABLISHMENT OF INTERNATIONAL COOPERATION IS V I T A L .

b/ ESTABLISHMENT OF A PRIORITY OVER ALL OTHER SCIENTIFIC STUDIES IN THE INTEREST OF PRECAUTIONARY MEASURES OF INTERNATIONAL SECURITY.

The memorandum finally requested the appointment of a scientific committee to supervise the supporting research material.

What was the suprising settlement of this proposal?

Within 48 hours U.S. government intervened at the U.N. Secretary General, and objected to any kind of international control on UFOs. Prohibited any committee to supervise the analysis, - and the originator of the memorandum Colman VonKeviczky instant removal from the secretariat service was demanded. At the same time the Johnson's Administration assured to U Thant, to start at once a thoroughgoing scientific study on the subject at the University of Colorado, - known as 'Condon Report'.

But let us review, how the U.S. government raised further difficulties on the ICUFON's official efforts: waking up the nations to the fact, that SPACE POWERS ARE IN OPERATION ON AND AROUND OUR PLANET, - and the development of an INTERNATIONAL UFO AUTHORITY by the nations, for the reasons of THE GLOBAL SECURITY AND SCIENTIFIC STUDIES ON THE PROBLEM:

A. November 6, 1967. The first public declaration of the Space Power Task Forces operation upon our civilization with unknown assignement - declared by 24 nations, was SILENCED and IGNORED.

B. June 27, 1967. A proposal accepted by Dr. Kurt Waldheim, Chairman of the U.N. Outer Space Affairs Committee, - to invite noted scientists and researchers to inform the nations at the Outer Space Conference in Vienna - WAS SIDE TRACKED.

C. April 3, 1968. U.S. government STOPPED an International Symposium at one of the largest TV station in USA. The participants were to have been the world's leading scientific authorities including USSR., taking exploring possible solutions of the global UFO problem.

D. August 14-27, 1968. Vienna. The U.N. Conference on Peaceful Uses of Outer Space - sponsored by USA and NASA - REFUSED to place the UFO problem on the conference agenda, despite the request by many of the participant nations. Request was supported by the 'Petition to the Nations' filed with the U.N. delgationson July 29, 1968 by ICUFON - DUIST e.V.

E. Nov. 23, 1968. FURTHER REJECTION came from the House of Representatives, US Committee on Science and Astronautics, - and on December 5, 1968 from the U.N. Outer Space Division, at a hearing and presentation of the global identity and operation of alien galactical space vehicles.

F. January 1969. United Nations SILENCED ICUFON's request about those nations, who are offered territory for an International UFO Research Authority, as it was proposed in the 'Petition to the Nations'.

As final evidence of the U.S. government's consistent counteraction and to force for acceptance of it's own Scientific Study (Condon Report), the value of which has long been discredited by conflicting reports

../..

we submit the following:

G. December 9, 1969, ICUFON submitted a memorandum to all the 139 premiers of the nations to convene a World Congress for International Consideration of Non-Terrestrial Objects Activity. Suprising, 7 days later, (instead of our issued Press Release # 11) the U.S. AF release was published by the U.S. news media; informing the nations that 'there has been no evidence found over 25 years, that UFOs represent any unknown technological developments or space ships from out of this world'.

This uncommon U.S. verdict on a vital global problem, however neglects to inform the public how UFOs have suddenly become "KNOWN TECHNOLOGICAL DEVELOPMENTS"; because they were explained by the US AF authorities on 26 January 1953 on the basis of "MANY COMPETENT OBSERVERS REPORT" as "INTERPLANETARY ORIGIN". (See encl.#2)

It is remarkable, that Robert C. Seamans Jr., AF Secretary stated that, "there is no threat to the national security" on this very continent on which another civilization became tragic victims of neglected security. As we know in the 16th Century "unidentifiable human beings" landed on this territory. The visitors assured the credulous native population of their unlimited love and friendship, while soil samples, minerals, vegetables, fruits, animals were peacefully collected to their governments. Decades pass. The queer visitors were soon forgotten, when one day large fleets of the European maritime powers appeared along the shores, and started the forceful colonization and civilization of our continent called AMERICA.

May I respectfully ask the highest commander of the worlds' largest military power, Richard M. Nixon, President of the U.S.A. "don't you find any similarity here?" After all, there have been numerous global reports of "SMALL HUMAN LIKE VISITORS" supposedly doing exactly the same as the European discoverers did in the early days of colonization; collecting ONLY soil samples, vegetables, minerals etc. And isn't it alarming, that somehow they have been able to relay information that they mean us "NO HARM"?

WHAT WILL YOU DO WHEN ONE DAY GIANT SHIPS APPEAR IN OUR AEROSPACE AND LAND ON THE NATIONS TERRITORY? Will the USA be responsible for the victim of a global panic, resulting from a thoughtless policy and University of Colorado Studies?

GLOBAL SECURITY AND HUMAN CIVILIZATION SHOULD NOT BE SUBJECT TO ONE NATIONS' POLICY!

It is regrettable fact, that since 25 years the superpowers are consequently destroying every single proposal made in good faith requesting throughgoing investigation on non-terrestrial objects activity. The long time overdue Internations Authority rather substituted by valueless scientific explanations to calm the public at large, instead of massive guarantees to the nations against any prospective action stemming from outer space.

ICUFON offers the following proposals for constructive promotion, to the esteemed delegates of the 7th Congress of Scientific Ufologists:

1/ Reaffirm by declaration the MAINZ UFO RESOLUTION (See encl.#1.) as follows: Inasmuch as no nation could identify UFOs manufacturer and origin, and because of a lack of an acceptable explanation from the US government.

../..

2/ Organization of our valuable younger generation on a coast to coast coordinated voluntary observer network, to obtain ONE and OFFICIAL nation-wide coverage of UFOs activity.

3/ This congress must consider to develop of a National Security and Scientific UFO Authority. We must realize, that the U.S. government 25 years policy on the problem, as represented by several projects and issues, is at present gravely discredited by those nations who are seriously investigating the same activity and consider the last University of Colorado study to be of dubious value.

Consequently we have to act, instead of engaging in further infinite talk. I certainly hope, that this congress is convened in the spirit of action and constructive promotion of the world most serious and neglected problem.

During the history of mankind, the invisible world, supernatural phenomena, ghosts, witches, anomalies, have never been created danger to the humanity. But the exploring alien crafts of extraterrestrial Task Forces operating on and around our globe - UNIDENTIFIABLE as being of earthly origin; INEXPLICABLE by present standards of scientific knowledge - are ALARMING TO THE NATIONS: DO SOMETHING UNTIL IT IS TOO LATE. The irresponsible negligence, and willful confusion of the population about the facts, are the gravest offense against the existence of our civilization."

RESOLUTION OF THE 7th INTERNATIONAL UFO CONGRESS November 3-6, 1967 Mainz, West Germany

CONSIDERATIONS:

Governmental authorities, i. e. USA. — USSR. — Canada, Czechoslovak Republic, Brazil, Argentina, etc. have established research bodies investigating the existence or non-existence of outer space intelligence.

Many Scientists of international repute on the basis of physical evidence of observation have urged immediate government and United Nations investigation of this global problem.

In consideration of this the International UFO Research and Analytic Network, represented by dir. Colman VonKeviczky MMSE, maj. ret. representing the United States of America main speaker at the 7th International UFO Congress of researchers at Mainz, Germany, Nov. 3—6, 1967 offered conclusive, scientifically analysed proof of the existence of intelligently guided devices in our aero-space and test-landings originating from outer space.

RESOLUTION:

THE 7th INTERNATIONAL UFO CONGRESS UNANIMOUSLY STATES AND PROCLAIMS THAT UNIDENTIFIED FLYING OBJECTS — UFOs — ARE IDENTIFIED VEHICLES FROM OUTER SPACE, AND THAT IT IS A QUESTION OF A VITAL PROBLEM CONCERNING THE WHOLE WORLD.

ALL NATIONS MUST UNITE IN MUTUAL RESEARCH AND SCIENTIFIC COOPERATION TO INVESTIGATE AND SOLVE THIS PROBLEM FOR THE COMMON CAUSE AND FOR THE MUTUAL ADVANCEMENT OF OUR PEACEFUL RELATIONSHIP IN OUTER SPACE.

PART »A« *The UFO Question as a Global Problem.*

I.

During the past two decades, certain governments, statesmen and some of the world's leading scientists have identified the UFOs as of physical appearance, as aerial vehicles „not manufactured by any nation on this Earth“ and originating from other celestial bodies.

This statement has support in the United Nations, but despite this facts not even one single customary Note of Protest had been filed with the UN Security Council which refers to the UFOs as a known or unknown power endangering the territorial sovereignty of any state.

It is a regrettable fact, that after 20 years of observations no official explanation regarding these extraterrestrial space-ships has been made available to the anxious population of the world.

II.

CONSEQUENTLY, during the last two years and parallel with our space explorations, the greatly increasing UFO reconnaissance activity combined with continued testlanding on the Earth's surface has resulted in a dangerously misinformed public, fear of panic as to the „unknown“ — and the nations' „highly confidential“ files have grown rapidly in number and have created even more of a problem.

The present alarming situation calls for immediate and expert investigation in order to calm the public, *before it is too late.*

III.

The above-mentioned global reconnaissance actions originating from outer space appear to observe, and sometimes to endanger, the nations' outer space —, atomic and military installations, air-, water-, and highway networks and public service and communications systems. To some, their behaviour seems to show a rather more unfriendly than friendly approach to our Earth and its nations, as they give no hint as to their assignment nor apparently have they made any official attempt to contact our governments.

Global security requires as an imperative measure an internationally organized, expert and scientific evaluation and research of all UFO sightings for the sake of:

- a) mutual information,
- b) establishing official contact with extraterrestrial beings and their governments,
- c) for preparing a global emergency in case of eventual landing of planetarians.

IV.

UFOs and their occupants on occasion seek contact with the population but avoid facing the nations' armed forces.

Consequently a world wide observation activity must rely fundamentally on the population and work in close cooperation with the governments, scientists and with those pioneer UFO researchers who have, for decades, been voluntarily working for the cause of humanity.

No private organization or individual can monopolise the investigation of a global problem for its own or any other nation's benefit.

V.

Through expert investigation of UFO and contactee cases THE FACTS must definitely be separated from SCIENCE FICTION, thereby serving the welfare of mankind.

VI.

Global UFO investigation has to stay apart from all temporary hostilities among nations, differences of race and religion or political or governmental structure.

For public and scientific registration of UFO activity and for any eventual official contact with representatives of outer space powers, the nations should ESTABLISH AN INTERNATIONAL INSTITUTE LOCATED ON GROUNDS DECLARED BY ALL NATIONS AS EXTERITORIAL.

PART »B« UFO Problem Related To The United Nations.

The representatives of the nations and the organisations at the 7th International Congress of UFO researchers in Mainz, Germany — take the liberty of calling the attention of the United Nations' Assembly to the following:

I.

The Constitution of the United Nations must primarily provide for the security of our globe and its 3 billion inhabitants, representing a highly developed civilization, against any action which could eventually originate through our peaceful exploration of outer space, thereby endangering our lives and our planet.

II.

The United Nations should be constitutionally authorized as the supreme authority in outer space. Astro-cosmonauts must be the legal representatives of the General Assembly in outer space and on celestial bodies.

III.

The Ionosphere of our Planet, between 50 miles (80 km) Theodor von Karman Line — and 550 miles (880 km) should be declared SOVEREIGN SPACE TERRITORY OF THE EARTH (SECURITY BELT TO OUTER SPACE) UNDER THE JURISDICTION OF THE UNITED NATIONS, to be appended to the 1919 Paris Convention of

Aerial Navigation and the International Civil Aviation Convention in Chicago, 1944, or to any other relevant treaty.

IV.

The Intercontinental UFO Research and Analytic Network as a non profit making organisation proposing the Resolution, issues its Global Security Project, which outlines cooperation amongst nations, their UFO researchers, scientists, governments, and through the United Nations a world wide and centrally organized

INTERCONTINENTAL RESEARCH INSTITUTE: the same to be constructed on publicly donated ground, *declared extraterritorial*, in order to achieve the aims detailed above.

With this world-wide Resolution, the Intercontinental Network respectfully requests:

Heads of States, Government Leaders, Church Authorities, military, air, naval and security forces, scientific, educational, industrial, trade and agricultural establishments, private foundations, international enterprises, individuals and the United Nations for MORAL, INTELLECTUAL, FINANCIAL AND ALL NECESSARY SUPPORT AND ASSISTANCE

in the establishment of an
INTERCONTINENTAL UFO RESEARCH
INSTITUTE.

* * *

As a result, the Congress, represented by UFO scientists, among them Professor Hermann Oberth, and leading researchers of 24 nations, urged the Intercontinental Network to submit the following resolution to 131 legal world governments; His Excellency the Secretary General of the United Nations, U Thant; the General Assembly of the United Nations;

UNESCO; the Ambassadors of the United Nations Missions and Observers; to His Excellency Dr. Kurt Waldheim, Ambassador of Austria to the United Nations and Chairman of the Outer Space Affairs Committee; prominent scientists; UFO researchers and the distinguished representatives of the Press and other News Media.

December 6, 1967

Dear Sir,

I take pleasure in acknowledging receipt of your letter of November 29, 1967 and can assure you that the contents of your communication have received full attention. I have also not failed to bring them and in particular the Resolution of the 7th International UFO Congress to the attention of the Outer Space Affairs Group at the Secretariat of the United Nations.

Sincerely yours,

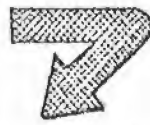

Dr. K. Waldheim
Ambassador

SCHEDULE

ACTIONS INSTITUTED AT THE UNITED NATIONS SECRETARIAT FOR GLOBAL SECURITY CONCERNING THE INTERNATIONAL STUDY OF ALIEN SPACE VEHICLES' ACTIVITY, - ORIGINATED FROM OUTER SPACE - CELESTIAL BODIES

When?	Who?	Subject of action	Result
June 30, 1965		UFO Analytic Group for global study within the U.N. Secretariat	silenced
Feb 1, 1966	Colman VonKeviczky, USA. NMSE. U.N. Secretariat.	Memorandum to Sec. Gen. U Thant requesting Committee to supervise global UFO analysis. Proposed international surveillance through UN-UNESCO network.	Noted by appreciation, collection and evaluation study of UFO literature directed to U.N. Outer Space Affairs Group.
May 9, 1966	Intercontinental UFO Research and Analytic Network. ICUFON-USA.	Global analysis of UFO reconnaissance activity, supported by 135 documents, filed with the U.N. Secretariat.	
		International Space Security Pact proposal submitted to the Secretariat, and delivered all the U.N. missions.	4 articles were accepted in the International Space Treaty.
July, 1966	Public made aware of United States of America's governmental UFO project - parallel with the confidential US AF "Project Bluebook." Carried out by Committee of Investigations on Outer-Atmospheric Phenomena, University of Colorado. Chairman: Dr. Edward U. Condon.		
Sept 18, 1966	Deutsche UFO Studiengemeinschaft, (DUIST) E.V. Pres: Karl L. Veit, Germ.	Urged international study on UFO. Offered DUIST archive and assistance.	Noted by appreciation
Sept 26, 1966	ICUFON-USA	Urged to develop the UN-UFO PROJECT, promised on February 24, 1966 by G.V. Narasimhan, - chief of U.N. Cabinet.	Evasive answer, noted by appreciation
Sept 1966	Dr. J. Allen Hynek Northwestern Univ. US. AF. UFO consultant.	United Nations global study urged, as due to a global problem.	Noted by appreciation
From August 1966 From February 1967	UFO NACHRICHTEN (German monthly) UFO CONTACT (English bimonthly publications)	Global publicity on intercontinental UFO Research and Analytic Network's activities assisting the United Nations.	Informations for U.N. Missions, Governments, - Scientists, etc.
Feb 2, 1967	ICUFON-USA	Proposed to invite UFO scientists, researchers in global coverage to the UN Conference on the Exploration and Peaceful Uses of Outer Space, August 14-27, 1969. Vienna, Europe.	Accepted by Dr. Kurt Waldheim, - Chairman of UN O.S. Committee.
Between March 1966 and June 1967	Prof. Gordon Evans, John G. Fuller, US. AF. Capt. Robert B. Loftin, Dr. Frank E. Stranges.	Suggested U.N. thorough-going international study of UFO activity and contact cases.	Noted by appreciation
June 5, 1967	Prof. James E. McDonald, University of Arizona.	Memorandum to Sec. Gen. U Thant. Immediate attention to the UFO activity among all the member nations, as an eminently international scientific problem.	Lecture at the U.N. Outer Space Affairs Group. Noted by appreciation.
JUNE 1967	United Nations Secretary General U THANT	Confided to friends: UFOs ARE THE MOST IMPORTANT PROBLEM FACING THE U.N. (UN authorities expressed U Thant's statement as "academic and personal"-reported by the press.)	
AUTHORITATIVE EVENTS FOLLOWING SECRETARY GENERAL U THANT'S STATEMENT:			
September 1967	Canadian Government.	Governmental UFO Project assigned to University of Toronto, Institute of Atmospheric Physics.	
November-December 1967	Union of Soviet Socialist Republics, USSR.	Published Governmental UFO Project. Head of the commission: AF. Gen. Porfiry Anatoli Stolyerov. Prof. Felix Ziegol: GLOBAL STUDY ON UFO activity.	
December 1967	United Kingdom	Governmental UFO Project (public) in preparation with the British Royal Air Force.	
March 10, 1968	France	France Air Force made proposition for governmental UFO project.	
Nov 5, 1967	International Congress of UFO scientists and researchers, Mainz, Germany. Hon. pres. Prof. Dr. Hermann Oberth.	PROCLAIMED RESOLUTION: International UFO Institute on extraterritorial territory for global security, scientific study, and attempt to physical contact the exploring alien space visitors.	Issued to all head of states, prime ministers, Gen. Staffs, AF's, Acad. of Sciences, U.N. Scientists, etc.

UFO WATCH FILTER CENTER

Dear Filter Center Participant:

Thank you for participating in the UFO Watch Filter Center. Your telephone number is on file. If any sightings occur in your coverage area we will contact you.

Do not be surprised when you don't hear from us for awhile. It will take several months to get enough people to participate to get something near complete coverage of the country. It may also be a lean time for sightings in your area.

If you are not now getting UFO Magazine, please let us know, it will contain a section of UFO Watch Filter Center final reports in future issues.

If there are any question or suggestions about the operation of the Center, please let us know. We have some master copies of UFO reporting forms and can give you some techniques on investigating if you need them. Good luck!

Sincerely,

Ed Biebel

Ed Biebel

ERHARDT DATA INDEX SYSTEM * * * * * E. D. I. S. *

The main purpose of the UFO CHRONOLOG will be, beginning with the second issue, to list all UFO sightings reported to it. The chronology in the next issue will contain the June 1969 listings, and issue three the July-August 1969 listings. Important sightings will be included in the chronologies as usual, but will also be summarized independently in paragraph form. Local (Virginia) sightings will be summarized paragraphically when they occur, and will be relisted when the chronology for their months comes up. The UFO Chronolog will list, beginning with issue 3, chronologies whose first month is exactly 4 months behind the first month noting the date of the issue of the Chronolog. This time gap allows foreign sightings to be listed as completely as possible.

Local sightings, I wish to stress again, will be described in the issue covering their dates. For instance, a June sighting in Richmond would be contained in detailed form in the May-June issue of the UFO Chronolog, and again in a chronology in the September-October issue.

All other sightings would be contained in chronologies 4 months after they occur.

Any person who has ever attempted to construct a chronology of UFO reports will have noted that in order to perform any detailed listing at all, a tremendous amount of paper space is necessary.

Using the Erhardt Data Index System, EDIS, one can list practically all details of any sighting, no matter how complicated, in 2 to 3 typewritten lines, providing one has the key to the abbreviations. The key to EDIS is contained in this issue and follows below. While the system is, at first, a burden, it is only a few steps away from an analysis by computers, which would use but one symbol for every abbreviation of 2 or more letters I have used. I have precluded use of the one-symbol system, advocated by Jacques Vallee and others, for abbreviations which will not require much memorization and which will permit relatively effortless reading.

Consider the following sample abbreviated sighting which would have come under the January 1969 chronology:

15/1600EDT2100CHT/FaddensCorners,Ont.,Canada/2/16/disc/V/silv refl/non/MR/slow?/
low?/wobbl/BE HW/MR/5mi/non/non/non/non/A/Saucers,Space,&Science no.55;G.
Duplantier,17 Shetland St.,Willowdale 445,Ont.,Canada---C;A

While this method seems at present monstrous, please read the following summary of the EDIS system, and afterwards see how the sample then appears to you. You will no doubt be surprised by its then apparent absurdly simple construction.

E.D.I.S. SUMMARY

GENERAL ABBREVIATIONS AND INFORMATION: The following symbols can be used under every item in the system.

	(underlining) denotes about or approximately		
NA	means	not applicable	
non	"	none	/ means; one item ends before
NR	"	not reported	this slash, and the next be-
USP	"	unspecified	gins immediately after it. /
var	"	various	is only a divider of items.

---continued---

ITEM ONE: DAY OF MONTH: Two-symbol day denotation: 07 or 24, for examples.

ITEM TWO: TIME OF DAY: The time of the sighting has four parts.

A. OOOO GMT Military time local & Local Time Zone

B. OOOO GMT Greenwich Mean Time

GMTt means the next day has already started, London time.

GMTy means sighting occurred the day before, London time.

NOTE: The purpose of a chronology, of course, is to, as closely as possible, obtain correct chronological order. Indefinite times such as "morning," "evening," etc., must therefore be assigned local times in order that a roughly correct GMT assignment can be made. However, when indefinite time is reported, it must be noted thus in "A" at the top of ITEM TWO so that no misinterpretations can occur. Therefore the following 4-letter abbreviations for indefinite times will be used in "A" (with their respective Local Time Zones, of course). Also listed below are the local time assignments used to determine GMT in item "B" when indefinite times are given in UFO reports. (E.g.: a night sighting in Baltimore, Md., in summer (EDT) would have ITEM TWO as: /niteEDT0200GMTt/)

dayt	daytime	1500	Laft	late afternoon	1700
Emor	early morning	0700	Eve	early evening	1800
morn	morning	1000	evng	evening	2000
Eaft	early afternoon	1300	nite	night, before	
aftr	afternoon	1500		midnight	2200

ITEM THREE: PLACE OR LOCALE: Normal abbreviations only will be used.

ITEM FOUR: NUMBER OF WITNESSES: Denoted by number or 1 of following abbreviations:

MT more than (e.g., MT20) many many

sev several tens, dozens, hundreds, etc., 10s, 12s, 100s, etc.

ITEM FIVE: NUMBER OF OBJECTS: See item 4.

ITEM SIX: TYPES OF OBJECTS: (Small letters denote small objects; capitals: large.)

cone, CONE	single cone	hdsc, HDSC	hemispherical disc
cyli, CYLI	cylinder	lite, ----	light source only
ddsc, DDESC	domed disc	oval, OVAL	oval or elliptical
disc, DISC	single disc	rckt, RCKT	rocket-shaped
fbll, FBLL	football-shaped	satn, SATN	saturn-shaped
flsp, FLSP	flattened sphere	sphe, SPHE	simple sphere
fspp, FSPP	flattened sphere w/peak	tear, TEAR	teardrop-shaped
gsph, GSPH	gloving sphere	trir, TRIR	triangular

***** STRANGE & UNUSUAL SHAPES WILL BE WRITTEN OUT IN FULL *****

ITEM SEVEN: FORMATIONS: The following abbreviations will be in use here.

A, C, T, V, etc., various	diam diamond	SbyS side-by-side
letter formations	ech echelon	scir semicircular
circ circle	line in-line	trir triangular
clus cluster(no formation)	rect rectangular	----

SATELLITE OBJECT OR MOTHER SHIP CASES: Two numbers in this item will implicitly denote such a case. First number notes large craft; the second, the no. of small craft. (E.g.: 2-20 would mean 2 mother ships with 20 smaller craft.) ITEM SIX in a Satellite Object case would specify larger craft first, smaller; second.

...continued

ITEM EIGHT: COLOR OF OBJECTS: (Note: abbreviations in use under this ITEM may be applied under other "ITEMs" to describe features:)

blak	black	pink	pink
blue	blue	purp	purple
chck	checkered	red	red
dark	dark	refl	reflecting
dot(s)	dotted, followed by a no.	silh	silhouetted
gray	gray	silv	silver
gren	green	strp	striped, followed by a number
metl	metallic	whit	white
orag	orange	yell	yellow

ITEM NINE: SPECIAL DEVICES: (Note: color or frequency of a fixture may also be noted: e.g., /ants-2-silv/ for "two silver antennas.")

ant(s)	antenna(s)	nob(s)	knob(s)
fin(s)	fin(s)	prp(s)	propeller(s)
leg(s)	leg(s) of landing gear	prt(s)	port(s), or porthole(s)
lit(s)	light(s)	tal(s)	tail(s)
ltb(s)	light beam(s)		

ITEM TEN: SIZE & DIMENSIONS OF OBJECTS: Abbreviations in use:

D	in diameter	L	in length	'	feet	m	meters
T	in thickness	"	inches	y	yards		other known abbreviations

ITEM ELEVEN: SPEED OF OBJECTS: Normal abbreviations will be used.

ITEM TWELVE: ALTITUDE OF OBJECTS: Normal abbreviations will be used.

ITEM THIRTEEN: MOTIONS AND ACTIONS OF OBJECTS: Note following abbreviations:

acatu	<u>acute & sharp angle turns</u>
avltb	<u>avoided light beam from ground or from observer</u>
ch-el	<u>abrupt change in elevation</u>
circg	<u>circling</u>
gnman	<u>general maneuvering</u>
hovrg	<u>hovering</u>
landg	<u>landing witnessed</u>
ldgto	<u>landing and take-off both witnessed</u>
pacin	<u>pacing of a vehicle or a person</u>
pendu	<u>pendulum motion</u>
sirto	<u>signalled in response to observer's actions (such as repeating light signals sent to it from the observer by flashlight.)</u>
st,rv	<u>stop(s) & reversal(s) in flight</u>
stsos	<u>side-to-side oscillation</u>
takof	<u>take-off observed</u>
wobbl	<u>wobble on axis</u>
vi,er	<u>violent & erratic maneuvering</u>
zgzag	<u>zigzag</u>

ITEM FOURTEEN: DIRECTIONS ARRIVING & LEAVING: Compass abbreviations will be used.

ITEM FIFTEEN: DISTANCE FROM OBSERVERS: Normal abbreviations will be used.

ITEM SIXTEEN: DURATION OF SIGHTING: Normal abbreviations will be in use.

...continued

ITEM SEVENTEEN: NOISE: Abbreviations in use:

orkg crackling boom sonic boom swsh swishing like the
pop(s) popping whng whining or whirring wind

ITEM EIGHTEEN: EXHAUST: Abbreviations in use:

flam single, momentary flame spks sparks
rkex rocket exhaust vptr vapor trail

ITEM NINETEEN: TRACES: Abbreviations in use:

anhr. angel hair mk(s) mark(c) loft on an earthly object such as the
frg(s) fragment(s) ospg outer space grass(aluminum strips) ground

ITEM TWENTY: EFFECTS: Abbreviations in use:

El electromagnetic effect Phy physiological effect
Exp exploded Psy psychological effect
Pho photograph or film taken Xup broke up into smaller pieces

ITEM TWENTYONE: SPECIAL NOTES: This category has three functions:

A. Denotes Occupant reports by four symbols:

- 1st-- O, for occupant case
- 2nd-- C, for contactee tale, or
E, for simple encounter only
- 3rd-- Type of occupant:
 - h humanoid under five feet in height
 - H humanoid over five feet in height
 - m monster under five feet in height
 - M monster over five feet in height
 - r robot under five feet in height
 - R robot over five feet in height
 - d hairy dwarf

4th-- Number of occupants seen

B. Explains misidentifications of natural phenomena

C. Explains Hoaxes

ITEM TWENTYTWO: RELIABILITY RATING: The following rating system will be used.

E excellent D dubious
G good H misidentification of natural phenomenon
A average P psychological (e.g., a hallucination)
U unverified H deliberate hoax

Ratings will be given based on content of report as presented to the editor; no D, H, P, or H ratings should be taken by the observers or investigators of any sighting as a personal affront or insult.

ITEM TWENTYTHREE: SOURCE: The source for a sighting will be given in full the first time it occurs in a chronology; thereafter, it will be abbreviated by a call letter or letters given it at the time of the first accrediting. For example, if two cases are credited to Skylook, item 23 in the first case would read:

/SKYLOOK, Box 129, Stover, Mo. 65078--C:A where C:A means "credited to A"
("A" is SKYLOOK)

The second time a report is credited to SKYLOOK, simply C:A will be given for item 23. Call letters go from A to Z, then AA to AZ, BA to BZ, etc.

...end

NATIONAL SCIENTIFIC AERIAL PHENOMENA RESEARCH ORGANIZATION

4637 Warner Road, Garfield Heights, Ohio 44125 Phone: Di-1-6333

ANNUAL REPORT

June 1970

The National Scientific Aerial Phenomena Research Organization, here-in-after referred to as N.S.A.P.R.O., has been constantly engaged in almost every aspect of U.F.O. scientific field research since its beginning in January of 1967.

The last twelve months have proved fruitful for N.S.A.P.R.O.'s scientific U.F.O. field research teams engaged in intensive programs which took some of its membership to many far off places unfrequented by man.

With your permission, let us glance briefly back into some of the activities of N.S.A.P.R.O. starting in the month of July of 1969.

Picture in your minds eye a dozen or so highly dedicated members of N.S.A.P.R.O. gathered together at a remote sky-watch base near Cleveland, Ohio. It's about nine P.M. in the evening. The day was extremely hot, high in the 90's. The sun was beginning to set, and the sky was very clear. From a distance, you can hear the voice of N.S.A.P.R.O.'s "Base Commander" Ronald Brasdovich giving out important instructions for U.F.O. sky-watching to his N.S.A.P.R.O. members. Mr. Brasdovich is the president of N.S.A.P.R.O. and his job is unique in that he must coordinate the sky-watch activities of the entire base, as well as all the administrative duties.

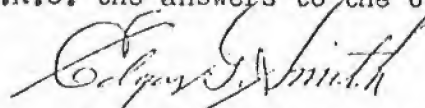

This particular N.S.A.P.R.O. sky-watch base consisted of three separate triangulated posts approximately twelve hundred feet apart. Along with a trained leader for each post there was sky-watching scientific U.F.O. detecting instrumentation such as the quadrants, radio's, magnetic detecting equipment, and many more too numerous to mention.

At ten-thirty P.M., one of the three sky-watch posts, code name "Red One" spied a huge reddish object coming directly toward the base from the north-west. "Red One" immediatly broke radio silence blasting out with coordinates of triangulation to the other two posts, code names "Blue Two", and "Base Command". You may have said, "The heat was on". To make a long story short, the reddish object passed over the N.S.A.P.R.O. sky-watch base very swiftly. There were three other sightings that night, all recorded scientifically on N.S.A.P.R.O.'s instruments and properly logged. Month after month, week after week, throughout the entire summer and fall of 1969 sky-watches were conducted at this sky-watch base.

To summerize this report, when one stops to consider what tremendously large amounts of time and space the occupants of the U.F.O.'s had to travel through to visit us here on this earth, they like us mortals, had to stand up against the strains of hurtling unpitigly and sometimes helplessly through the many universes, through new and uncharted dimensions of time and space, through heavens and through hells, to achieve their goals of conquering, once and for all, the newest frontiers of endless space which they hope will provide for them future worlds of peace and their dream of eternal life.

Science alone can never provide us with all the answers to all the many mysteries of the U.F.O.'s, but without science, man lacks the foremat, or compass to guide him on his way throughout the universe. The same science shall, with the Faith in God, give N.S.A.P.R.O. the answers to the U.F.O.'s.

Sincerely submitted,

Edgar G. Smith, founder and director
of N.S.A.P.R.O.

John J. Robinson

For Release To The 7th Annual
Congress Of Scientific Ufology

June 26th. 1970

Mr Chairmen and fellow delegates to the Congress of Scientific Ufology.

My group which is known to all of you as U.F.O.R.B.L. or UFO Research Bureau of Lorain, has done some to further the Ufo work that we are doing. We will be working closer with a lot more groups throu out the United States and overseas. We will be contacting different people and asking a lot of questions about our line of work in research.

We have done some on the spot sighting research, such as landings, and axial observation. We contacted people for a meeting place and recieved one from the Salvation Army in Lorain, which is a new building, we have full use of the basement, our meetings are open to the public, we have invited different groups of people around Lorain to help let the people know what is going on around the world about UFOs, also about the government surpression on Ufos.

We are studing all aspects of the field of UFOs. Most of the people in my group along with myself still think these crafts of Flying saucers are extratrestreal, they do not come from our own solar system, but from a much nearer Galaxie and are using some of the planets in this solar system as jumping of points or refueling stations. Sence many have been seen between the moon and the Earth by Astronauts and also a few Astronomers. We don't know what their perpose is for coming here, but there has to be a reason, a very good reason or why would they travel so far just to see us ?

This is basicly on the lines we have been thinking and working toward, theg truth to the real answer, why are they here. We are going to try and set up some Electronic Equipment for field research, along with sighting research which will help use in the long run to come closer to the answer. We will try and keep in closer contact with the congress

"How do you observe UFO'S scientifically?" That is a good question,

which has many answers. The Cleveland, Ohio group of UFO observers in NSAPRO has been experimenting for some time with observing methods and instruments. We are trying to find out the best practical ways to observe without using elaborate equipment. We started from scratch with a few ideas, some enthusiasm and some previous experience in observing UFO'S on the part of two observers, Edgar Smith and James L. Black. We are presently trying out everything we can do with inexpensive and home-made equipment, and are aiming at future improvements when better facilities, more money and more skilled observers become available.

A very small percentage of the published UFO sightings include only exactly measured data. The great majority of sightings are made from only one observing site, and mostly by people who had no anticipation of seeing any such phenomena. When suddenly confronted with some strange, unknown object, they have no exact idea how big the UFO is, how far away it is, how fast it is moving or how bright it is, unless it passes close in front of or behind some known object at a known distance. Scientific knowledge of strange phenomena is obtainable only when these data are measurable. So how do you measure the distance to a UFO without using radar? By observing it simultaneously from two or three sites that are widely separated by known distances.

Astronomers and surveyors measure distances to inaccessible objects by a method known as Triangulation. To obtain the distance to the Moon, for instance, an imaginary triangle is created in space, extending from the Earth to the Moon. It has a known side several thousand miles long, extending from one observatory to another. At each observatory base, angles of exact direction to the Moon's center are measured with telescopes, at the same instant. The two sight lines which converge at the Moon differ in their directions in space by a small angle at the Moon, say one degree.

This is called the Parallax angle. The angles observed at the two observatories, plus the parallax angle, add up to 180 degrees. The two long sides of the space triangle are then calculated by trigonometry. Any triangle can be completely calculated if one side and at least two angles are measurable, as in this case.

The same principle of Triangulation can be simplified so that amateur observers can measure the distance to a UFO, without having to calculate it with trigonometry. They can observe a UFO on purpose, not just accidentally, using simple, home-made angle measuring instruments simultaneously from three observing bases, whose exact distances apart are previously measured. The instruments, called Quadrants, can be made at home out of scrap materials and a little hardware. The observing techniques are simple and easily learned by inexperienced observers. By making a scaled drawing of some triangles, obtained by measuring angles, and by measuring the triangles on paper, the UFO'S distance is solved quickly and graphically, with practically no computation. Although we have done most of our sky watching at night for luminous UFO'S the same methods can be worked for daytime sightings. This article is based both on theory and practical experience, and describes methods of how to observe UFO'S by triangulation.

We divided our observers into three teams, each with a captain for that observing post or base. In order to observe the same UFO simultaneously, we inter-communicate between bases by three walkie-talkie radios, all on the same frequency on the civilian short wave band. These have a range of about 1 1/2 miles, and do not need a radio amateur's license to operate. To save time in radio transmissions and to name each observing base uniquely, we call our bases "Red - One, Blue - Two, and Base Command"; the latter one is called "Yellow - Three", when put on a drawing. Exact coordination of UFO observations is controlled by the Base Command captain, who directs the whole operation by radio.

The pre-requisite for success in this work are willingness to do hard work cheerfully, persistence in spite of failures and delays, and harmonious action as a team. Experience is not necessary to begin, but the action should be considered fun, and not a work chore or a duty. One must keep an open mind, and accept new ideas without emotional friction or resistance. Nobody is yet a complete expert in the field of Practical Ufology, and nobody knows all the answers yet. We don't.

Choosing the site for a Triangulation Base, consisting of three Observing Bases, involves considering several factors. We considered the following list.

1. The site should be in a locality where UFO'S have been seen frequently enough to expect some chance of future sightings.
2. It should be an outdoor area where the horizon is as unlimited as possible in all directions, away from any close, bright lights on the ground, and where curious strangers won't interfere, or Police patrols bother you at night.
3. It should be easily reached by auto, and not too far from the observers' homes. Too long a return trip home after a late sky watch will keep some observers away.
4. Certain practical conveniences are necessary or very desirable. If electric power, drinking water and toilets are available nearby, and a telephone, so much the better. We chose a country farm without these facilities. Hiking clothes and shoes are most practical. At each of the three observing bases, there should be a light, folding table or a picnic table, steady enough to write on and to hold small equipment, a tarpaulin or canvas to lay large equipment on, to keep it dry, or to lie down on, folding camp stools, several flashlights and perhaps a dim lamp on the table, insect repellents, and canteens for water or coffee.
5. In order to attract attention of UFO'S to the area, some

Ufologists have tried using a geometrical pattern of colored spotlights or floodlights on the ground nearby, aiming them at the sky, and perhaps flashing them in sequence with a time switch. We have not done this, but several years ago this scheme was tried by others, and it worked in attracting UFO'S at night. If you try it, shade the eyes of the observers from the lights. Someone should check in advance of trying it, with the officials at the nearest airport, to make sure that such lights could not confuse any strange aircraft pilots, making them mistake your bases for a small landing field. UFO'S could land in a small area. Most planes cannot. You don't want to be responsible for any plane cracking up where it is unsafe to land.

The following was our experience. We found that the uncle of one of our club members owned a 21-acre farm in a rural area where few people go, and where he was not working the farm for crops or animals. The owner had seen a UFO close up, some years ago. He gave us permission to use his farm (outdoors only) for our Triangulation Base, without cost. We chose our three observing bases in level, open fields where we could see directly from base to base. The principal one, which we call "Base Command", was located on a flat knoll with an unobstructed horizon. The nearest trees are a few hundred feet away. A short length of scrap gas pipe was driven into the ground to mark the exact spot for instrumental observations. About 1200 feet Northeast from this, in another open field a temporary pole was set up with a white cloth on its top, to sight on while measuring the line to it. A man stood at each end of this base line, to keep the men handling the tape line from wandering off the straight line. These men used a 50-foot tape line and plumb lines, to measure the distance. They kept their tape level each time, and wrote

down the number of tape lengths they had measured, to prevent errors.

At the end of this line, just 1200 feet from "Base Command" position, another pipe was driven into the ground, marking our base "Blue - 2". On another day, the angle was chosen as $62^{\circ}00'00''$ between this base line and the second line to base "Red - 1". A borrowed surveyor's transit was set up over the pipe at "Base Command", and the angle was turned off of the first line, sighting on the pipe at base "Blue - 2", and setting a pole near base "Red - 1" for line to it. The second line was measured just 1000 feet long, and a pipe was set at base "Red - 1".

Since not everyone will have access to a surveyor's transit instrument, the angle between base lines can be measured accurately enough by the surveyor's Plane Table method. We used it for reconnaissance to estimate the angle of 62° , on a previous day to the one when we borrowed the transit. A Plane Table is simply a leveled board to draw on, held rigidly on top of a tall tripod. Even a steady folding card table would do. I made my own Plane Table. It was set up over the pipe at "Base Command", leveled with a spirit level, and a line was drawn on paper which was then taped to the board. The line was oriented to magnetic north by sighting over it, in line with a compass needle. A 12-inch triangular ruler was laid on the paper so that its edge was over the pipe in the ground. The sighting pole at base "Blue - 2", with a white cloth attached to it, was sighted on by eye, and the ruler's top edge was aligned with this and line was drawn on the paper along the edge of the sighting ruler. Then the temporary pole at base "Red - 1" was set approximately for line there, and it was sighted upon with the edge of the ruler, and a second line was drawn along the ruler's edge. A protractor then measured the angle on the paper between the sight lines. It was about 62° , so this value was chosen for use with the surveyor's transit on the later day. This graphic Plane Table method is quite good enough to use without the transit. The third base line from "Red - 1" to "Blue - 2" did not have to be measured on the ground; a scale drawing of the big triangle

was made with a decimal scale and a protractor, and that third base line was measured on it as 1146 feet long. This was later confirmed by trigonometry.

An alternative method of measuring the base lines with much less work, but less accurately, is to borrow a transit and a surveyor's level rod or stadia rod, and read the amount of the rod that is included between two cross-hairs in the eyepiece of the transit, as seen from opposite ends of the base line. This amount is calibrated in feet and hundredths on the rod. It corresponds to distances to the rod from the transit, and works on the principle of similar triangles. We used this method also as a check. Surveyors use it for reconnaissance and topographic mapping.

In the future, we hope to interest scientific and technically trained individuals to add more sophisticated and accurate instruments to our equipment. Radar is too expensive to obtain, for getting the distance of a UFO directly. If an optical type of Range Finder could be used, and if it could aimed quickly enough to catch a UFO, it would be much less work than triangulating. If an optical instrument with a photometer could be used, the brightness of light from a UFO could be measured, and the amount of energy it radiates could be computed, from which we could deduce quite a bit about its energy sources. If a spectrogram of its light or its other radiations could be made, much more could be deduced about its energy and how it radiates. Magnetometers could detect the intensity of a UFO's electromagnetic field. We have a simple, home made Cartwright type of Magnetic Detector at our base, which responds to magnetic fields, and which warns of the approach of a UFO with a strong force field about it. Some intense UFO radiations have been reported, intense enough to sunburn a person's skin when close enough and low enough. Sometimes Artificial Radioactivity has been induced in the

Robert S. Easley

ground, where a UFO has been on the ground for some time, or hovering low. Radiation detectors like Geiger Counters are desirable, to measure and detect such radioactivity. If a brilliant UFO came close, dark sun glasses would be desirable to protect an observer's eyes from Ultraviolet Radiation. If a UFO should block out radio communications between bases, due to its strong force field, it might be desirable to experiment with some kind of sound signals between bases. These would have to operate without electronic devices which might also be blocked out of action. All these ideas need testing. If a tape recorder could record the authentic sounds of a real UFO, analysis would reveal more facts about UFO'S. To test whether a UFO's light is pulsating too rapidly for the eye to see, try this: watch the UFO through binoculars, and rapidly oscillate the binoculars by hand through a small angle, keeping the UFO in sight. If its light is pulsating rapidly, like a neon sign on 60-cycle alternating current will do, the oscillated UFO image will show bright and dark images separated momentarily by the angular motion. If the UFO's light is steady, or pulsating at a very high frequency, its images should merge into a bright line of light without perceptible variations in brightness, in the binocular. Try this technique on bright stars that are twinkling, and see how they vary in brightness this way. It works!

EDITOR'S NOTE: This special edition of UFO MAGAZINE is published with the hopes that other researchers in the UFO field will look at the serious work that has been done by NSAPRO (see Winter 1968-69 UFO Mag.), and will themselves begin similar projects that may one day solve the enigma of the elusive disks.

All scheduled features planned for this issue will be incorporated into the Winter issue.

RRH

UFO MAGAZINE is published quarterly by UFO Magazine Publications P.O. Box 2708 Cleveland, Ohio 44111. Subscription in the U.S. and Canada is \$2.00 yearly, \$3.00 overseas. Editors: Rick and Janie Hilberg; Managing Editor, Edward Biebel; Assistant Editor, Robert Easley; Associate Editor, Thomas Nealings; Art Editor, Karen Walker; Chief Investigator, Billy Shears

It has been generally accepted throughout the field of UFOlogy that UFOs-or flying saucers- are a world-wide phenomenon. It is also accepted that a vast majority of the people in other countries knew, or have heard something, about UFOs. I now find the latter "accepted" knowledge hard to accept.

UFOs are indeed a world-wide problem. This I do accept. We have received, and are still receiving, many excellent sightings from very reputable people in such countries as Germany, Russia, China, Japan, Australia, etc. We have not received, however, is substantial evidence that the knowledge of UFOs is world-wide!

As a member of the U.S. Navy I have had the opportunity to travel to various countries in the Western Pacific portion of the world. Coming into numerous ports for R & R (Rest and Relaxation) I have made it a point to take a poll of 100 persons in each port who could speak English fairly well, and ask them all the same simple question: "Have you ever heard or read anything about flying saucers?"

The persons I asked were all native to that respective country. They ranged from construction workers, bartenders, housewives, merchants, prostitutes, barbers, policemen, soldiers and hotel operators.

I was not interested in their age, sex, education, or such. I only asked them the single question mentioned above. This may make it an impartial, or even impractical survey, but time did not allow me to go into any great detail.

The break down of the survey is as follows; with the percentage being that number of people out of 100 who had heard about flying saucers:

Olsonapo City, Philippines	12%
Taipei, Taiwan	15%
Kaohsiung, Taiwan	11%
Hong Kong	10%
Sasebo, Japan	8%
Saigon, South Viet Nam	3%

As you can see, the result is very low indeed. The highest percentage, 5%, was in Taipei, the capital city of Taiwan. The lowest percentage, 3%, was in Saigon, South Viet Nam despite the large number of Americans in the city.

Gray Barker, noted saucer researcher and Editor of SAUCER NEWS, explains this lack of knowledge as follows: "I think that a lot of the reason that so many people here (United States-R.E.) know of UFOs is that they all read and take newspapers, see tv, etc. In underdeveloped nations many people are illiterate or semi-illiterate and would tend not to know everything that was going on. They probably wouldn't think much of it if they saw a weird light in the sky."

If Mr. Barker's assertion is correct then perhaps some form of education system should be set-up in these countries. This would take much time, money and effort, but the rewards would be well worth it if we could come up with significant UFO sightings that would throw some light on the present UFO mystery.

The Honorable Richard B. Russell
United States Senator
Winder, Georgia

Dear Senator Russell:

I gather from information I have recently come in contact with that the United States Air Force is no longer going to continue operation of Project Blue Book, the operation dealing with so-called "unidentified flying objects".

While it is perhaps quite true that a great deal of discussion on the problem of unidentified flying objects "pro" and "con" has taken place without clear result, and while the value of further discussion may be questionable to many, I think it would be of some potential value to take whatever measures necessary to insure that the files of Project Blue Book remain intact, perhaps in the Library of Congress, in a restricted section if necessary.

Regardless of current opinions held by some, the fact remains that this information -- and I would imagine that there is a considerable volume of it -- may be of value to scientists and/or others doing research work in this area. This would, in my opinion, apply whether there is any objective actuality to the UFO phenomena or not. An example of the latter might be in the area of sociological research.

I am not presently aware of the Air Force's policy on this, or even if any clear policy exists. I do hope that the files will be kept intact, rather than destroyed or disbursed, and will be available, at the least, to qualified scientific personnel.

I request that you look into this matter, and if necessary bring your influence to bear in favour of keeping the files intact, as per the above.

Sincerely,

Allen H. Greenfield

of Senator Russell

DEPARTMENT OF THE AIR FORCE
WASHINGTON 20330

OFFICE OF THE SECRETARY

JAN 9 1970

Dear Senator Russell:

This is in reply to your inquiry in behalf of Mr. Allen H. Greenfield regarding Air Force disposition of Blue Book Unidentified Flying Objects (UFO) records.

The Air Force regards the documents accumulated during the past 21 years of investigating UFOs to be of definite historical value. As such, they will be stored intact at the Air Force Archives, Maxwell AFB, Alabama. Bona fide researchers and news media representatives will be granted access to them upon application to Headquarters USAF (SAFOI), The Pentagon, Washington, D. C. 20330.

We are glad to be of service in furnishing you this report.

Sincerely,

KENNETH DILL, Colonel, USAF
Congressional Inquiry Division
Office of Legislative Liaison

April 20, 1970

Mr. John J. Robinson, Chairman
Robinson Committee on Ethics, Correspondence and Membership
Congress of Scientific Ufologists.

Dear Jack:

As you know I strongly support the Congress of Scientific Ufologists, because of this, I ask that you tender to the Congress the enclosed registration fee of five dollars (\$5.00).

Because of illness in the family, I am unable to join with my fellow researchers at this years Congress. However since I wish to promote the aims of the fellow members of the Congress of Scientific Ufplogists, I can only at present lend my financial aid.

I therefore ask that you tender my registration fee even though I must be absent from the Roll Call, I remain,

Sincerely Yours

Mr George Smyth

DR. MIRAN LINDTNER

BORN — LJUBLJANA, YUGOSLAVIA — 30.3.1920

DIED — FRANKFURT, GERMANY — 29.8.1969

By accident on Frankfurt Railway Station on his way to a conference of The World Veterinary Association at Belgrade.

"HE WAS A VERY KIND PERSON AND ALWAYS THOUGHT OF OTHERS AHEAD OF HIMSELF".

These words were written by a Veterinary Research Officer and President of The Australian Veterinary Poultry Association, Clive A. W. Jackson, B.V.Sc., who worked closely with Miran for some years past. They appear in an article about him in *"The Poultry Farmer"*. The article, which also pays tribute to his work, mentions "brilliant genius, diagnostic ability, the never-tiring help he gave to the poultry industry, painstaking approach to details" and concludes, "Truly we have lost an inspiration, a philosopher and friend". *"The Land"* Newspaper related incidents telling of the very worthwhile practical contributions Miran had made to the industry.

It was amazing the diversity of his interests and activities and the energy and time he devoted to them. Miran was Vice-President of the R.S.P.C.A., a performer on the piano and violin of professional proficiency, a composer, a keen chess player and a very competent painter.

He accumulated nearly 1,000 hours' flying time in the Yugoslavian Air Force during the Second World War and represented Yugoslavia as a goal-keeper in international soccer. He played first grade tennis and squash. His scholastic brilliance caused him to be nominated for the Tito Prize.

He secured his Doctorate of Veterinary Science, with extreme distinction, at Bologna University. In the period of nearly twenty years he had been in Australia he helped many migrants to settle into Australian life. The Yugoslavian Soccer Club was founded for this purpose and Miran

was a prime mover in this and he also coached various soccer teams. He had the heart-warming ability to make his many friends feel they were special friends.

He was President of U.F.O.I.C. Sydney (the oldest existing U.F.O. Group in the world today) for 16 years and was well known on the world scene, being very largely responsible for the respect in which U.F.O.I.C. is regarded.

I have known Miran since shortly after his arrival in Australia and, while we first became associated through U.F.O.I.C., I was privileged to share other interests with him. The breadth and depth of his interests, the brilliance of his insight, his various talents and skills all spoke of the vital, searching man of unsatisfied learning he was, and his drive and example spurred others to do more than they normally would have done. All these things are of importance, but to all of us who knew him, we take greatest pride that the wisdom of his heart was so manifest in his sense of honour and kindness:

We are all better men and women for having known him. Our hearts go out to Lillian, his widow, and we trust that their children Sonya, Miranda and Miran, Jr., will all abundantly fulfil the high hopes he had for them.

A Memorial Service was held at Christ Church St. Laurence on Saturday afternoon, 27th September, 1969. The 130 people present were privileged to hear some of his beautiful compositions played on the church pipe organ.

FREDERICK J. M. PHILLIPS, F.C.A.I.A., VK2ZQ, PRESIDENT, U.F.O.I.C.
